A woman **chooses** life **80% of the time** after seeing her baby through an ultrasound.

Many leaders in California are putting laws in place to make California an "abortion sanctuary." It's in essence abortion trafficking. We at CPCSC will stand on God's Word to be that city on the hill (Matthew 5:14). We will continue to provide free ultrasounds, share the gospel of Jesus Christ, along with providing other resources.

Will you stand along side us?

Julianna came to the Clinic sad because she was pregnant again. She is married, but they weren't ready for another baby. They recently had their first baby a few months ago and were very surprised to learn about their second pregnancy. During her visit to the Clinic, we provided her an ultrasound and other resources. Our nurse performed the ultrasound. Julianna heard her baby's heartbeat and chose life for her baby. The Clinic supported her and her family all along the way.
